About This Content

Bequest

– the game of the horror genre, which is a RPG first-person on Unreal Engine 4, good graphics, creepy atmosphere, will be waiting you in the gameplay, also the game has sequences of actions, each your decision can change the game that will take you to the different finals of the game.

The plot of the game

The main character is Dima the grandson of the deceased grandmom. He arrived in her house, that she had left after her death. Got inside the house, the main character realized the truth. In real, his grandmother has tried to protect him from the threat that was keeping her here.

- In the gameplay of the game you will have to go through atmospheric locations, with a fascinating sound!
- Also, you are going to challenge the paranormal phenomenon to get out of an endless maze of illusory shackles.
- Each location influence on the state of the main character.
- Game locations will differ from the previous one by its atmosphere and a certain passableness of each level

This is the third time I have had to leave a review for this scammer game developer.

Basically he released Bequest. It received negative reviews from a lot of people & to avoid negative reviews, he changed the name of the game but in turn, also downgraded the quality of his game... (which wasn't already good to start off with?)

2 weeks later he has since released Bequest as a DLC as it has no reviews and is starting fresh.... too bad the consumer has to purchase Last Answer before they purchase this garbage game...
